INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From:	9/25/2021	Date To:	9/26/2021
FAWN		Time From:	0700	Time To:	0700
3. Objective(s):					
Management Objectives					
- Provide for and maintain Public and Firest Respo	nder safety utilizing the inci	dent safety analysi	is process.		
- Ensure COVID-19 precautions and best practices	s are met at all times.				
- Protect values at risk; including infrastructure, imp	provements, private, and pu	blic lands, natural,	and cultural re	sources.	
- Foster and maintain relationships with all coopera	ators and stakeholders.				
- Ensure coordinated, timely andaccurate release of	of public information.				
- Maintain fiscal accountability and keep costs com	mensurate with values at ris	sk.			
Control Objectives					
Keep the fire North of Hwy 299					
Keep the fire South of Shasta Lake					
Keep the fire East of Interstate 5					
Keep the fire West of Blue Sky Road					
General Situational Awareness:					
Steep and rugged terrain, critically dry and recept	ive fuel beds, active area for	r fire history and dr	rought stressed	trees.	
2 VOTEN N					
In the COVID-19 environment, high density popula	ations or large groups are pa	articulary at risk. To	o help protect y	ourself, you	ur family

SPOT FORECAST for Fawn 9-25 IAP...CAL FIRE 537 PM PDT Fri Sep 24 2021

NWS SACRAMENTO CA

Forecast is based on forecast start time of 0700 PDT on September 25. If conditions become unrepresentative...contact the NWS.

.DISCUSSION...

Slight cooling trend over the weekend as high pressure gradually weakens over Norcal. Band of high clouds forecast to move over the fire area Saturday night as weak disturbance moves across the area, although the air mass will remain dry. Chance of showers Monday into Tuesday over the fire site as a low pressure system and cold front move across the area.

. SATURDAY . . . Sky/weather..... Mostly sunny. Areas of smoke. Max temperature....84-89. Min humidity......13-18 percent. Wind (20 ft)..... Slope/valley.....North to northeast winds 4 to 8 mph shifting to the south in the afternoon. Ridgetop......Variable less than 3 mph early in the morning becoming south 5 to 10 mph after 1200-1300. Mixing height......100 ft AGL rising to 3500-4000 ft AGL in the afternoon. Transport winds.....Northeast less than 3 mph early in the morning becoming south after 1000 and increasing to 5 to 10 mph after 1200-1300. CWR...... percent. .SATURDAY NIGHT... Sky/weather.....Partly cloudy (high cloudiness). Min temperature....59-64. Max humidity.....40-50 percent. Wind (20 ft)..... Slope/valley.....Northeast winds up to 5 mph. Ridgetop......South 8 to 15 mph. Mixing height.....Lowering to 100-200 ft AGL early in the evening. Transport winds.....Northeast up to 5 mph. CWR..... percent. LAL....1. .SUNDAY . . . Sky/weather......Mostly sunny. Max temperature....77-83. Min humidity......19-24 percent. Wind (20 ft)..... Slope/valley.....Northeast winds 4 to 8 mph shifting to the south in after 1000. Ridgetop.....South 5 to 11 mph. Mixing height......Rising to 3500-4000 ft AGL in the afternoon. Transport winds.....Northeast less than 5 mph early in the morning becoming south 5 to 10 mph after 1000-1100.

CWR..... percent.

LAL....1.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1 TYPE OF FIRE: Wildland

FIRE NAME: Fawn OPERATIONAL PERIOD: 9/25-9/26, 0700-0700

DATE ISSUED: 9/24/2021 TIME ISSUED: 1830

INPUTS

WEATHER SUMMARY:

WARM & DRY, LIGHT S/SW WINDS

High pressure.

Temp: 82-87 max; 59-64 min RH: 17% min; 50% max

Wind: S/SW 5-10 day; NE 5-10 night slope/valley with S 8-15 ridges

OUTPUTS

FIRE BEHAVIOR

GENERAL:

S/SW wind will direct fire toward Jones Valley east of Bear Mountain. Dead fuel accumulation from winter storm damage & mortality. BI & ERC near 90th percentile & above average for this time of year. Live & dead fuel moistures at critical

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

的特别的是他的人的人的人	Max. Flame Length	Max. Rate of Spread	Spotting Spotting	Probability of Ignition	
Grass	6-7' (2 m)	55-70 ft/min (1-1.3 km/hr)	< 0.3 mile (0.5 km)	100%	
Shrub	15-20' (4.5-6 m)	50-60 ft/min (1 km/hr)	< 0.4 mile (0.6 km)	100%	
Timber Litter	< 5' (1.5 m)	5-10 ft/min (0.1-0.2 km/hr)	< 0.3 mile (0.5 km)	100%	
Timber Understory	8'-15' (2.5-4.5 m)	10-15 ft/min (0.2-0.3 km/hr)	< 0.3 mile (0.5 km)	100%	

^{**}minimum safety zone size for grass and brush fuels is 1/3 acre (0.1 Ha) for a Strike Team of Engines.

SPECIFIC:

Branch I:

Fire spread will flank and may find topographic channeling for upslope runs.

DIV M / T / U:

Higher elevation transition to Ponderosa pine and white fir. Greater spotting potential from ember cast,

especially with isolated and group torching. Potential for wind in alignment with Bear Mtn. Rd & Dry

Creek Rd.

DIV W:

Watch for fire getting established in East Stillwater or East Valley Creek, which could align with

afternoon gusty winds.

AIR OPERATIONS:

Anticipate mostly clear air with partial visibility obstruction due to smoke.

Mixing height: 4,000 ft. AGL. Transport winds: S 5-10 mph. Sunrise 0700, Sunset 1901.

SAFETY

Changes in fire behavior are often subtly signaled by atmospheric changes that can go unnoticed when firefighters are focused on more tangible effects of fire and terrain. Watch for the wind shift!

^{**}minimum safety zone size for timber fuels is 2/3 acre (0.25 Ha) for a Strike Team of Engines.

^{**}minimum safety zone size for WUI/shrub fuels is 3 acres (1.2 Ha) for a Strike Team of Engines.

Fuels and Fire Behavior Advisory

Northern California

September 16, 2021, to September 30, 2021

Subject: Potential for extreme fire behavior due to continued critically low live and dead fuel moistures. Very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, periods of excessive heat have caused elevated to record fire danger rating values across much of northern California. Anticipated moisture could temporarily reduce some threat across the far north PSAs.

Discussion: Fires burning in northern California continue to exhibit extreme fire growth due to critical fuel conditions. Rapid fire spread can be fuels driven. Wind events have led to extreme rates of spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Extreme to Exceptional levels of drought conditions continue to exist across much of Northern California. The drought is expected to persist or intensify through the rest of fire season. Deficient rainfall and snowpack with early melt off, coupled with periods of extreme heat has resulted in fuels that are critically dry, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this
 year. Recent scattered rain has reduced some ERC values, but fuels are rebounding quickly. Extreme
 fire behavior has been observed in all fuel types and both live and dead fuels. Continue to anticipate
 increased spread rates, spotting, and active nighttime burning.
- The combination of extreme levels of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. 1000-hour fuel moistures continue to trend at record low levels in many areas. Live fuel moistures in grasses, shrubs, and trees, remain at critical levels in many areas of Northern California due to limited green-up this spring. Expect fires to ignite easier, spread faster and burn hotter. Reports of blistered paint on vehicles have been surprisingly frequent so far this year. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. Aviation
 utilization is often insufficient in moderating rate of spread without immediate heavy ground resource
 response. Anticipate higher resistance to control in all fuel types.
- Northern California continues to experience large fire activity and multiple team deployments and will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. Everyone, every day, returns home safely.
- The frequency of North to Northeast offshore wind events increases from mid-September into the fall.
 These strong winds are often accompanied by very low RHs and will pose an increased hazard when combined with this year's critically dry fuels conditions. Watch for change.

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding
 normal expectations for this time of the year. Local briefings need to be thorough and highlight
 specific fire environment conditions. These include but are not limited to local weather
 forecasts, PocketCards, ERC's, live and dead fuel moistures.
- Suppression actions need to be based on good anchor points, escape routes, and safety zones.
 Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates.

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Me in into and Diablo-Santa Cruz, and the northeastern portion of Far Eastside.

HIDDEN HAZARDS

EXTENDED DAYS OF BURNING VEGETATION CREATES UNSEEN HAZARDS

- Watch Out Be on the lookout for hidden hazards
 - Avoid trees that have been burning for long periods of time
 - Areas of the burn may have stumps remaining causing hazards
 - · Utility poles within and around the fire perimeter

Mitigation - If it doesn't look right make it known

- · Flag hazard trees and communicate the dangers to your supervisor
- Stump holes are difficult to identify, use your hand tool to feel for ground depth
- Evaluate, identify, and make known, the hazards in your work area

FATIGUE

PHYSICAL AND MENTAL FATIGUE MAY COMPROMISE SAFETY

Watch Out - Be on the lookout for signs of fatigue - look out for one another

- · Chronic feelings of exhaustion, feeling "spacey"
- · Impaired decision-making and judgment · Low motivation · Moodiness
- Look for signs and symptoms among your fellow workers, irritability, anger, depression

Mitigation - Proper nutrition reduces fatigue

- Eat foods, which provide steady energy limit sugary, fatty, fried foods
- Hydrate proper hydration prevents fatigue
- Manage work rest ratio while performing work and take full advantage of time off the line to rest

LEADERSHIP

IT'S THE FOUNDATION TO SAFETY

Watch Out - When it does not seem clear, it probably isn't

- Crews sacrificing safety for the sake of the task
- Ignoring basic safety policies and protocols
- Things falling through the cracks, breakdown in communications, no clear plan

Mitigation - Leaders are not rank specific and are at all levels in an organization

- Leaders hold themselves accountable to doing the right thing
- Hold each other accountable to doing the right thing
- Leaders lookout for one another and take care of one another

Each Safety Message is designed for a daily Tailgate Safety discussion

FAWN FIRE INFORMATION SHEET

Fire Information Line: (530)448-2466

Please scan the QR Below for CAL FIRE's Social Media Policy 0691.

INCIDENT MAIL

The PIO Trailer will receive mail/packages shipped to the Incident. Please ensure all mail addressed to the incident follows the format below:

(YOUR NAME, YOUR ORDER NUMBER)
C/O FAWN FIRE BASE CAMP
PUBLIC INFORMATION TRAILER
SHASTA DISTRICT FAIRGROUNDS
1890 BRIGGS ST, ANDERSON, CA 96007

LOST AND FOUND

Any items that are found, please bring them to the PIO Trailer located at the entrance to Base Camp and leave them with PIO staff. Please leave your name and contact information and description of lost items so we can attempt to reunite you with your items.

INCIDENT TRAINING MESSAGE

All trainees on the incident need to check in with the Training Specialist (TNSP)

- Training Specialist is located inside Shasta Hall.
- Trainee Data Form is attached to the IAP.

DEMOBING trainees need to close out with the Training Specialist in order to receive documented credit for your assignment

- Bring a completed and signed ICS 225 or 226
 Performance Evaluation
- A completed <u>Evaluator's Recommendation</u> Form
- Position Task Book

ALL forms available at the training office.

Trainers if you leave the incident before your trainee you will need to complete a <u>Performance Evaluation</u> for the time your trainee was assigned to you.

Jim Rustice 707.227.5073

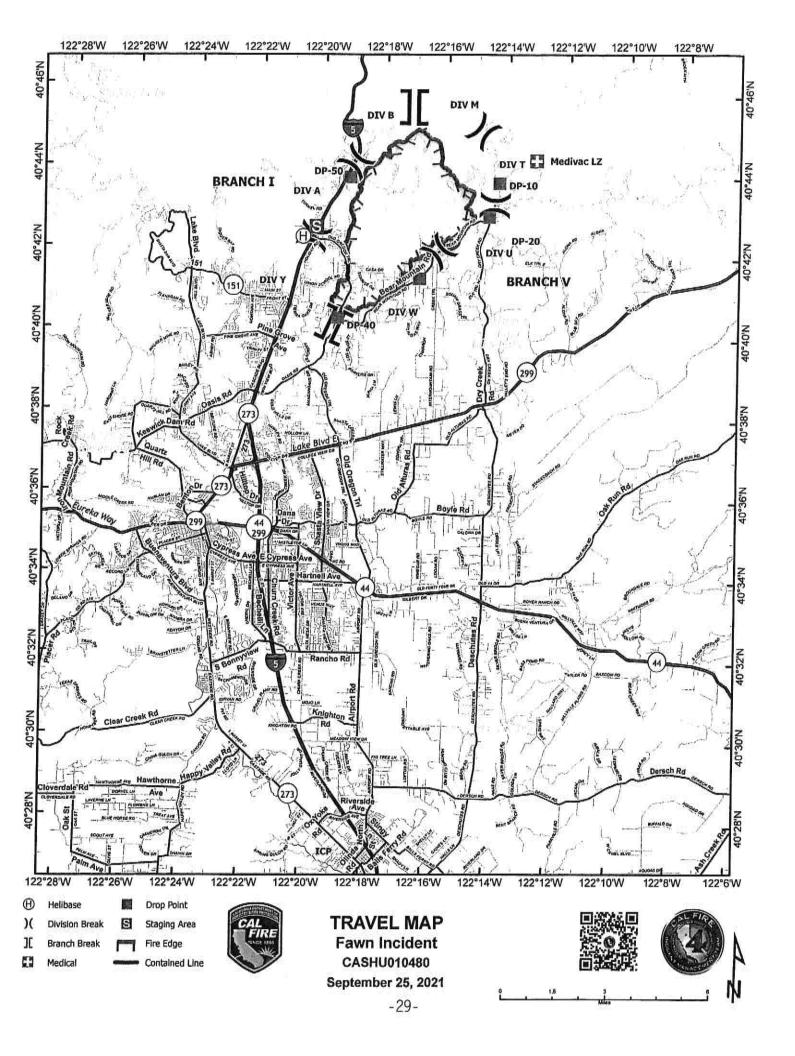

Incident Trainee/Trainer Data Form Fawn Fire CA-SHU-010480

Training Specialists:

- > All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this form and see the Training Specialist.
- Prior to or as you process through DEMOB, remember to close your training package. To close your training package bring: 1) A performance rating from your trainer. (ICS 225)
 - 2) Your task book that has as many entries as possible by your Trainer.
